The Center

The Center to Inform Personnel Preparation Policy and Practice in Early Intervention and Preschool Education is a five-year project established in January, 2003 and funded by the Office of Special Education Programs.

Information gathered will be utilized to identify critical gaps in current knowledge and design and conduct a program of research at the national, state, institutional and direct provider level to address these gaps. This program of research and policy formulation will yield information vital to developing policies and practices at all levels of government, including institutions of higher education.

Summary

Questions

The Center's Purpose

The purpose of this Center is to collect, synthesize and analyze information related to:

- (a) certification and licensure requirements for personnel working with infants, toddlers, and preschoolers who have special needs and their families,
- (b) the quality of training programs that prepare these professionals, and
- (c) the supply and demand of professionals representing all disciplines who provide both ECSE and EI services.

The Center's Goals

- ❑ To compile a comprehensive database of current licensure and certification standards for all EI/ECSE personnel.
- ❑ To develop a comprehensive profile of current training programs for all types of personnel at the institutional, state, and national levels.
- ❑ To describe the current and projected supply and demand for personnel.
- ❑ To design and conduct a program of research to identify critical gaps in current knowledge regarding personnel preparation.
- ❑ To develop and disseminate recommendations regarding personnel preparation policy and practice based on research findings.

Research Strand I

Personnel Standards

Status	<ul style="list-style-type: none">•Part C Profile•Part C Credential•619 Profile•619 Blended Credential
Child/Family Outcomes	<ul style="list-style-type: none">•Part C Credential/Outcomes

Research Strand II

Preservice/Higher Education

Status	<ul style="list-style-type: none">•Higher Ed Profile•Doc Program Profile•OSEP Program Profile•Blended EC Programs and Standards
Child/Family Outcomes	<ul style="list-style-type: none">•Student Outcomes for Blended Programs and Subsequent Practice Outcomes•Collaborative Doc Program

Research Strand III

Inservice/Ongoing Training

Status	<ul style="list-style-type: none">•National Study of Competence and Confidence•Profile of State TA Networks
Child/Family Outcomes	<ul style="list-style-type: none">•Comparisons of Professional Development Models

Higher Education

- Create a database of personnel preparation programs
- Analyze the characteristics of training programs
- Determine how training programs provide learning opportunities specific to young children and families
- Develop a profile of current training programs

Higher Education Survey

- Comprehensive review of preservice preparation for all types of personnel who serve infants, toddlers, and preschoolers with disabilities
 - Recruitment
 - Operational characteristics
 - Program characteristics
 - Instructional methods
 - Collaborative opportunities
 - Alignment with standards
 - Program evaluation

Methodology

- Survey
 - Web-based
 - Paper or phone options

Sample

- Program representatives
 - Department chair, faculty
- 5659 programs contacted
 - Two-year, four-year, and graduate colleges and universities preparing personnel to work with infants, toddlers, and preschoolers with disabilities

Sample Characteristics

- The phone interview invitations were disseminated to 739 programs from Occupational Therapy, Physical Therapy, Speech and Language Pathology, and Special Education departments. From March 2001 to August 2001 e-mails and phone, calls yielded 102 programs willing to take part in the phone interview and 77 that completed the phone interview.
- Numerous programs responded that they currently did not have coursework in place that emphasized birth to three early intervention personnel preparation (n=35)
- Nine programs responded that they did not wish to participate.

Methodology: Survey

- The purpose of the phone survey was to address how higher education programs were preparing students to handle issues currently faced by many practitioners in the field of birth to three early intervention.
- The phone interviews were approximately 20 to 30 minutes in length and addressed the personnel preparation issues surrounding: natural learning environments, service coordination, early intervention fieldwork and practica, interdepartmental collaboration, and barriers and facilitators that have affected their ability to meet the needs of students interested in birth to three early intervention.
- Program faculty being interviewed were also asked to provide a list of required courses for degree completion and information on current texts used within their required coursework.

Survey Responses

- **Survey responses:** 1131 programs
- **Survey section submitted:**
 - Section 1: 1127
 - Section 2: 859
 - Section 3: 787
 - Section 4: 750
 - All Sections: 746
- **Sample representation:**
 - 50 states & D.C.
 - 18 types of programs
